

FLIPTALES

Redefining The Future Of Commercial Interior Designing

Vizstore launched its Material Supply vertical last month, and the early trends have been encouraging to say the least. The team booked orders across multiple categories with double digit margins. With the focus on ensuring a smooth supply chain for fulfillment in the coming months, the team looks to expand its footprint across major metros in the next quarter.

The SaaS vertical, with impetus on driving adoption and onboarding premium stores, has been successful in ensuring renewal of 120 Stores over the last six months. Stabilizing cash flow run rate and minimising operation burn, the team shall continue to iterate on tech side developments to position itself as the defacto software in the interior Furniture and Furnishing Industry.
